

2017 1 oz Platinum American Eagle

First released in 1997, the Platinum American Eagle is the only Platinum coin produced by the U.S. Mint. Platinum Eagles are minted in much lower numbers than the Gold or Silver American Eagle coins, adding collectible value to the .9995 fine Platinum content.

The Platinum Eagle coin features two classic American images: the Statue of Liberty and a soaring bald eagle. Both are shown in beautiful detail on a coin not commonly seen in the marketplace. Not only do Platinum Eagle coins have low mintage numbers, they are not always even minted. From 2009-2013, and again in 2015, no bullion Platinum Eagle was produced. The 2017 Platinum Eagle is sure to be popular among both collectors and investors.
