

# 2015 Cook Islands 2 oz Silver Gray Wolf (North American Predators Series)

The *Canis lupus*, or gray wolf, is recognized across North America as a ferocious predator. The Cook Islands have turned this ferocity into a beautiful APMEXclusive® .999 fine Silver coin with many unique features. Most striking is the enameled canine tooth, inlaid by hand on each coin. This tooth adds further dimension to the detailed image of the gray wolf baring his teeth.

These large 2 oz Silver coins are 50 mm in diameter, providing a higher amount of detail than the most common coins around the world. Additionally, each of these limited-mintage coins features an antique finish, adding depth and beauty to the design. This spectacular coin has a mintage of just 500 coins providing even more collectible appeal.

## HIGHLIGHTS

- First in a brand new North American Predators series.
- Antique finish provides a unique look to the detailed design.
- APMEXclusive® release backed by the Cook Islands.
- Limited mintage of 500 coins adds further collectible appeal.
