

2016 Australian 1/2 oz Silver Tiger Shark

APMEXclusive®

One of the most fearsome ocean creatures and the fourth-largest shark in the world, the tiger shark is now forever immortalized in Silver. The Perth Mint, in collaboration with APMEX, has introduced the final release in their Shark Series celebrating this unique and unmistakable hunter.

Each of these coins contains 1/2 oz of .9999 fine Silver, making them more pure than previous releases of the Shark Series. This 2016 Silver coin exhibits a beautiful depiction of the ferocious tiger shark swimming through the water. The coin displays the Silver weight and purity, providing assurance of the high quality of each coin.

Taking its name from the dark stripes down its body that fade through maturity, the tiger shark can be found in many tropical waters. The dark stripes plus a light underbelly make this apex predator a “see or be seen” threat to its prey. Despite being a formidable danger in the ocean, the tiger shark is considered a near-threatened species due to fishing.

HIGHLIGHTS

- Celebrates the tiger shark, a fearsome apex predator.
- Final release in the APMEXclusive® Perth Mint Shark Series.
- Each coin contains 1/2 oz of .9999 fine Silver.
