

2017 Australia 1 oz Proof Gold Domed Northern Sky

In 2012, the Royal Australian Mint introduced their domed Silver coin series featuring constellations visible from the Southern Hemisphere. Following their popularity, the mint released a two-coin Gold Celestial Dome series. This is the second release and celebrates the Northern Hemisphere's beautiful skies.

This large Gold coin, with a 38.51 mm diameter, not only shows numerous northern constellations, but it exhibits them in high-quality detail. The domed shape of the coin adds further beauty, as the constellations appear as they do in the night sky.

HIGHLIGHTS

- Domed design makes constellations appear as they are in the sky.
- Contains .9999 fine Gold.
- Final coin in the Gold Celestial Dome series from the Royal Australian Mint.
- Comes in a display box with certificate of authenticity.
