

# \$10 Liberty Gold Eagle MS-61 PCGS (Random Year)

Following the Coinage Act of 1792, the United States Mint began producing Gold coinage for circulation throughout the country. The first \$10 Gold coin, called a Gold Eagle, was produced for just 10 years. In 1838, a new design was introduced called the \$10 Liberty Head Gold Eagle. This design lasted the longest of any \$10 Gold coin, staying in production until 1907.

In addition to the timeless American designs of Lady Liberty and an American eagle, each of these coins has been certified to be in MS-61 condition by PCGS, one of the top two coin grading services. This certification adds further collectible appeal to these coins that have not been minted in more than 110 years.

## HIGHLIGHTS

- These coins were originally minted 1838-1907.
- PCGS certification guarantees the MS-61 grade.
- Random year listings mean you can build your collection easily.

## SPECIFICATIONS

**ACTUAL GOLD WEIGHT:** 0.4838 troy oz
