

2014 5 oz Silver ATB Everglades National Park, FL

The Everglades 5 oz Silver America the Beautiful .999 fine Silver coin is the 5th and final coin of the America the Beautiful Silver Bullion Coin™ Program released by the U.S. Mint in 2014 and the 25th coin overall in the series! The Everglades is a natural region of tropical fresh water wetlands in southern Florida that long went unexplored but appeared on maps from Spanish cartographers who had not seen the land. The word Everglades dates back as far as the late 1700s when it was originally called “river glades.” However, the early settlers drained a large portion of the “glades” to convert them into new land for agriculture, which spawned a railroad and more speculators and settlers to arrive and permanently stay. Today, the Everglades consists of 1.5 million acres of sawgrass, mangrove forests, and wetlands. The Everglades can best be seen in a canoe or small water vessel in the winter when temperatures are more moderate and the bugs are minimal. The Everglades was established as national park in 1934. The coin itself features an Anhinga, or snakebird, which gets its nickname from its swimming style, as only its colored neck appears above water. Unlike ducks, their wings are not waterproof, which allows it to dive underwater and stay down for significant periods of time to catch its prey.

HIGHLIGHTS

- 5th and final coin of the America the Beautiful Silver Bullion Coin™ Program released by the U.S. Mint in 2014
- Individual coins will come in capsules
- Multiples of 10 will be delivered in mint-issued tubes without capsules.
